

AMMONIA INDUSTRY EXPERTISE

Woven Metal Products (WMP) is a state-of-the-art fabrication facility in Alvin, Texas. With more than 45 years of experience, WMP has grown with its customers. With that growth has come increased expertise, capabilities, and state-of-the-art equipment. A visit to the WMP facility yields a vast array of welding workstations, laser, plasma and water-jet cutters, perforating machinery, machining centers, press breaks, knitting machines and much more, all executed by trained and skilled personnel.

Specific to the ammonia industry, WMP manufactures, but is not limited to:

- Scallop distributors
- Baskets
- Cover plates
- Center pipes

WMP has supplied the ammonia industry for decades, manufacturing proprietary technologically advanced products for its customers.

No matter the requirement, WMP will work with customers to create, modify or review drawings and designs with its in-house engineering department. WMP's quality control department will also work with customers' inspectors as needed and offers a variety of in-house testing procedures.

WMP serves local, domestic and international partners all with the same strategic purpose - reliable quality, partnership attitude and attention to detail. Because of these qualities, WMP has built a reputation as one of the best fabrication facilities in the world today.
