

REACTOR PRECISION: RADIAL-FLOW

Woven Metal Products, Inc. (WMP) is known for its precise work and attention to detail where the tightest of tolerances are critical. WMP has been servicing radial-flow reactors and supplying companies with needed internals for decades.

Some of the products WMP manufactures for radial-flow reactors include scallops, baskets, center pipes, cover decks, base assemblies, expander rings and more.

WMP has an internal engineering department that can assist customers needing drawings or designs from scratch, from used or old parts, or in conjunction with a customer's own engineering department. Because WMP can help at any step along the way, this makes WMP a great partner for any licensor, refinery, chemical plant, installation company, turnaround company, engineering group or others that need assistance. WMP understands that when internals are needed, it could mean critical processes have stopped or a plant has been shut down. Customers and partners have come to rely on WMP for their expediency, quality and attention to detail.

Contact WMP today to discuss your custom radial-flow internals needs.
