

ENGINEERING EXCELLENCE & QUALITY CONTROL

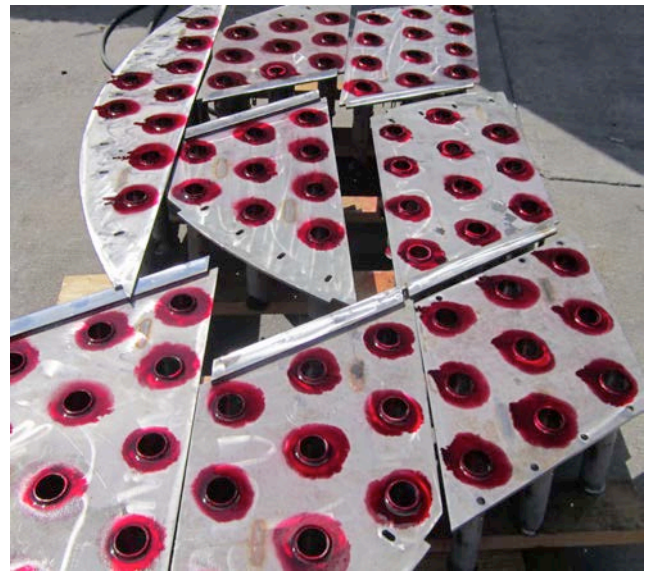

Engineering Excellence

Woven Metal Products, Inc. (WMP) has an on-site engineering department to assist customers at every step along the way. Whether a customer needs parts designs or drawings created from scratch, from old or used parts, or with a customer's existing engineering department, WMP will get the job done. Many customers know what they need, but may not have the drawing or specifications required for fabrication. Using the latest in engineering and design software, WMP engineers can supply drawings and designs, including process designs for a variety of applications and needs.

Quality Control

The Quality Control (QC) department at WMP offers a variety of necessary testing procedures that may be specifically needed for a certain job, or as required by a customer, including:

- ✓ Positive Material Identification (PMI) to guarantee authenticity
- ✓ Non-Destructive Examination testing (NDE), including but not limited to:
 - Leak testing
 - Magnetic Particle testing
 - Radiographic testing
 - Ultrasonic testing
 - Eddy Current testing
- ✓ 100% Materials Traceability throughout entire job process
- ✓ Material Test Reports (MTRs) with all materials purchased
- ✓ Destructive testing as needed

WMP has a fully-equipped and experienced quality control department that inspects all jobs before they are sent to their final destination. The quality control department certifications consist of an American Welding Society (AWS), Certified Welding Inspector (CWI), ASNT Level II Liquid Penetrant Certifications and ASNT Level II Visual Testing Certifications. All certifications require rigorous training and annual continuing education, which is critical to WMP as it ensures the highest level of quality at all times.
