

# HEADERS & LATERALS

Woven Metal Products (WMP) is a state-of-the-art fabrication facility in Alvin, Texas. With more than five decades of experience, WMP manufactures headers and laterals for various industry applications. With the latest equipment for producing these highly specialized products, customers can rest assured that no job is too big or too difficult for WMP to handle.

WMP offers headers and laterals across all material types, in multiple configurations, including profile/wedge wire, spray nozzle, pipe and tube, or other designs.

One preferred method is profile/wedge wire, available in both header-lateral and hub-lateral assemblies and can be connected to distributor headers and spider hubs through a variety of ways such as fabricated flanges, fully welded assemblies and more.

## Profile / Wedge Wire benefits include:

- Continuous flow design increases open area for even distribution
- Highly resistant to clogging
- Strong, with flexible design options
- Easy to clean and maintain
- Various types and sizes available

WMP offers all products with complete drawings, materials test reports (MTRs), assembly instructions and any other necessary documentation. WMP is available to meet all customer needs 24 hours a day, seven days a week, 365 days per year. No matter what the requirements are, we understand the importance of timeliness and quality for all operations.

WMP serves local, domestic and international partners, building on its reputation as one of the best fabrication facilities in the world today.
