

OUR COMPANY

We're Woven Metal Products (WMP), a family-operated company based in Alvin, Texas, USA, right outside of Houston.

Since 1967, we've been a trusted fabrication and manufacturing partner for companies of all industries and sizes.

Our team specializes in fabricating reactor and tower internals, as well as custom fabrication needs. We can manage all your metal processing needs in-house, including punching, perforation, cutting, machining, forming, welding, and assembly. Whatever your project requires, we'll deliver it to your exact specifications.

As a solutions provider, we often collaborate with our customers to find remedies for their pain points. We welcome a challenge and encourage our customers to innovate with our team.

We serve local, domestic and international partners all with the same strategic mission: reliable quality, partnership attitude and attention to detail.

OUR FACILITY

- ✓ Our ISO-9001-certified, state-of-the-art facility is designed for producing results, with 125,000 square feet of shop space set on 85 acres.
- ✓ No job is too large. Our shop features 26 feet under the hook, accommodating 30 tons or more.
- ✓ We centrally supply our 50+ welding workstations with welding gases, increasing productivity, speed and quality.
- ✓ We regularly reinvest in the newest equipment, including robotic tools, to improve our production accuracy and add fabrication capacity.

Solutions at Your Service.

FABRICATION EXPERTISE

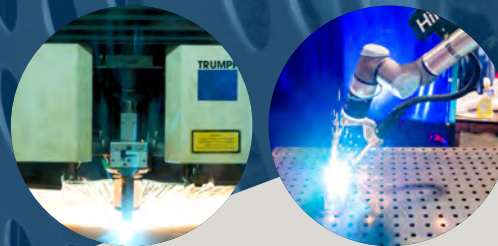

- ✓ Acoustical Dampening
- ✓ Architectural Accents
- ✓ Assemblies
- ✓ Decorative
- ✓ Equipment Guards
- ✓ Filters
- ✓ Frames
- ✓ Hammermill Screens
- ✓ Lighting Accessories
- ✓ Shaker Screens
- ✓ Signage
- ✓ Specialty Perforation
- ✓ Stairway & Fill Panels

OUR EXTENSIVE EQUIPMENT

When it comes to processing materials needed for your custom fabrication project, we've invested in the latest technologies for the job. Here's a sampling:

- Flow Waterjet 60,000 psi
- Fully Automated Welding Cells (ABB and Hirebotics)
- Hass VF-6 Machining Center
- Hass TL-3 12" Lathe
- Hydmech Saw V21 / 26APC
- Kinetic 5000 Machining Center with 5 axis HD Plasma (800-amp with 10' x 20' cutting table for plate or pipe)
- Multiple CNC Brake Presses (Trumpf 5320, 7036 Amada HFE 100, HFE 220)
- Multiple Rolls (Small Diameter to Large Diameter)
- Multiple Trumpf Punch Press (500, 2020, 5000)
- Trumpf 5030 6kw Laser 5' x 10' Table with Tube, Pipe Cutter and Lift Master
- Trumpf 3030 6kw Fiber Laser 5' x 10' Table with Lift Master
- Whitney 60-ton Punch Plasma Fabricating Center

We also offer finishing, from metal grinding to powder coating options, onto complete product assemblies. We take pride in the appearance of your final products and want to be your partner for your needed solutions.

VALUE-ADDED SERVICES

DESIGN / ENGINEERING:

On-site engineering services to create, modify or review existing drawings / designs.

QUALITY CONTROL (QC):

Certified welding inspectors on-site; full QC Department inspects every shipment.

IN-STOCK MATERIALS:

Unlike others, we stock common materials and sizes for fast project completion.

PACKING / SHIPMENT:

Custom crating built to ensure quality to the final destination.

STORAGE / WAREHOUSING:

Offered to customers needing off-site storage.

PATENT / CO-DEVELOPMENT:

We collaborate with customers as needed to improve processes and innovate designs.
